# CopperAM for Industry

Lunch-to-Lunch Workshop

September 12–13, 2022  
Fraunhofer IWS Dresden

**TECHNISCHE  
UNIVERSITÄT  
DRESDEN**

**amcd**  
Additive Manufacturing Center Dresden

# CopperAM for Industry

---

What properties can be achieved for additively manufactured copper? Which geometries can be realized and which process chain is required for a particular application? Which additive processes are available and what are the advantages and disadvantages?

Experts from industry and research will give an overview of common additive manufacturing processes such as laser powder bed fusion, electron powder bed fusion, cladding, fused filament fabrication and binder jetting with specific reference to the processing of pure copper and copper alloys.

## What to expect

- Lunch-to-lunch workshop
- Expert talks
- Lab tour
- Social event & networking

## Fees

- 250 €
- Speakers free

**Registration deadline: August 31, 2022**
