

FRAUNHOFER INSTITUTE
FOR MATERIAL AND BEAM TECHNOLOGY IWS

**TST 2019 –
1ST WORKSHOP ON THERMAL
SURFACE TECHNOLOGIES
INDUSTRIAL PERSPECTIVES AND CHALLENGES**

**JANUARY 29, 2019
FRAUNHOFER IWS DRESDEN**

Experience the buzz in thermal surface technologies!

The Center of Thermal Surface Technologies (CTST) at Fraunhofer IWS Dresden offers an unrivaled variety of thermal surface technologies for a broad range of applications. Building upon comprehensive experiences in materials engineering and thermal processes, the center's mission is to support industrial customers from invention to innovation along the value chain.

The first workshop on Thermal Surface Technologies is offering a platform for scientific and technical exchange across various thermal technologies. Internationally renowned experts are presenting new development trends in this field and address current challenges, providing the basis for discussions amongst presenters and attendees.

Topics:

- Thermal spraying
- Laser cladding
- Laser hardening
